Youssouf MARZOUK

Developer passionate about learning and building. Experience in Fullstack
Development and precisely the MERN stack.

SKILLS

Front-End	**Back-End**	**FrameWorks**	**Others**
HTML	Node.js	React / Redux	Git / GitHub
CSS / SASS	MongoDB	Express.js	Webpack / Parcel
JavaScript ES6 / JQuery	Firebase	Bootstrap	Visual Studio Code
TypeScript	Python	Flask	npm
	MySQL / SQLite		Figma

EXPERIENCE

GitStart — *(October 2021, present)*

Full-stack JavaScript developer - (full-time/remote)

RELEVANT PROJECTS

Get-It-Done — (*preview*, *code*)

Project management system uses the MERN stack and some other tools (Redux,
Socket.io, AWS). It improves teamwork and efficiency by task assigning and
progress tracking. With additional functionality, like real-time chat and file
storage.

One Piece Encyclopedia — (*preview*, *code*)

A guided tour of my favorite anime, built using React and a REST API with
Node(Express.js) and MongoDB. Provides information about the story, characters,
arcs, and episodes. Also allows for a community to grow and share opinions via
comments.

FireStock — *(in_progress*, *code*)

Stock traking app, Front-end with React, and Back-end with Firebase. Gives stock
prices on different scales and currencies with a prediction for future values
using AI.

ADDITIONAL INFORMATION

Languages : English – Arabic – French.

Courses & Certificates : cs50 – OpenClassrooms – freeCodeCamp.

Interests : Algorithmic challenges – Fitness – Science – Anime.
